CAREER OBJECTIVE

B.Tech Information Technology student specializing in AI/ML, with hands-on internship experience building and evaluating classification models and computer-vision pipelines. Proficient in Python, machine learning fundamentals, data annotation, and data quality review. Seeking an AI/ML Internship to contribute to model development, dataset preparation, and training workflows while growing as an applied ML engineer.

CORE SKILLS

- **AI/ML:** Machine Learning Fundamentals, Model Training & Evaluation, Computer Vision, Real-Time Gesture Recognition, Data Labeling & Annotation, Dataset Preprocessing, Classification Models (Logistic Regression, Random Forest)
- **Programming:** Python, Java, C, C++
- **ML/Data Tools:** Data Analytics, Data Structures, Data Quality Review, Feature Selection, Data Cleaning
- **Web Technologies:** HTML, CSS, JavaScript, Flask (for serving ML models)
- **Other:** Problem Solving, Effective Communication, Teamwork & Collaboration, Adaptability, Time Management

INTERNSHIP EXPERIENCE

AI with Data Science Intern | TVK Technologies

Jul 2026 - Aug 2026

[View Verified Certificate](#) — issued by TVK Technologies, supervised by Priyatharshan A, Program Manager

- Built an AI-based heart disease prediction model as the core internship project, contributing to data preprocessing, model development, and evaluation under mentor supervision.
- Documented project workflow and collaborated with the team on task execution, as measured by successful project completion and sign-off by the Program Manager.
- Strengthened applied AI/ML and data-handling skills by completing structured, hands-on training across a full one-month internship.

PROJECTS

AI-Based Heart Disease Prediction System | TVK Technologies Internship Project

github.com/JeevithalTDev/AI-Heart-Disease-Prediction

- Built a machine learning classification model (Logistic Regression and Random Forest) to predict heart disease risk from patient health data, using accuracy, precision, and recall to select the best-performing algorithm.
- Performed data cleaning, feature selection, and preprocessing on a structured health dataset to improve model input quality.

AI-Based Indian Sign Language Recognition | Personal Project

github.com/JeevithalTDev/AI-Indian-Sign-Language

- Built a real-time Indian Sign Language recognition system using webcam/camera input to capture and classify hand gestures.
- Developed a Flask-based web application to serve the trained model, enabling live gesture detection through the browser interface.
- Implemented image capture and preprocessing (frame extraction, resizing, normalization) to feed camera input into the recognition model.

EDUCATION

B.Tech, Information Technology (GPA: 8.5/10) | Annai College of Engineering and Technology 2023 - 2027

Class 12th, State Board (83.6%) 2021 - 2022

Class 10th, State Board (84.8%) 2019 - 2020

CERTIFICATIONS

- Artificial Intelligence / Data Science (AI/DS) — [View Certificate](#)
- Web Development — [View Certificate](#)
- Java Programming — [View Certificate](#)
- Python (Basics) — [View Certificate](#)
- Digital Marketing Strategy — [View Certificate](#)
